

MEENAKSHI NIRBHAVANE

Junior DevOps Engineer & Site Reliability Engineer (SRE)

CONTACT

Email: nirbhavanameenakshi@gmail.com **Phone:** +91 9892169335 **Location:** Maharashtra, India

Portfolio: meenakshi824-code.github.io/my_portfolio **GitHub:** github.com/meenakshi824-code **LinkedIn:** linkedin.com/in/meenakshi-nirbhavane-b85222344

PROFESSIONAL SUMMARY

Junior DevOps Engineer and Site Reliability Engineer (SRE) with hands-on experience supporting production microservices, containerized applications and CI/CD workflows. Experienced in Grafana monitoring, OpenSearch log analysis, API troubleshooting, incident management and Jenkins deployments. Hands-on with Docker, Kubernetes, Kind, Helm, Linux and Nginx, with practical cloud experience on AWS across EC2, VPC and Security Groups.

PROFESSIONAL EXPERIENCE

Junior DevOps Engineer / SRE

Aug 2025 – Present

ICICI Lombard

Remote

- Monitored a production insurance platform of 20 microservices (12 core Bancs services + 8 wrapper APIs) across a 6-node Kubernetes cluster using Grafana dashboards to track CPU, memory, API response time and pod health.
- Diagnosed recurring HTTP 504 Gateway Timeout spikes during peak traffic by correlating Grafana metrics and application logs, tracing the root cause to elevated database connections rather than compute capacity (CPU stayed below 40%).
- Tuned Kubernetes liveness and readiness probes for Java/Spring Boot services, increasing initialDelaySeconds to 30s and failureThreshold to 5, eliminating CrashLoopBackOff restarts caused by ~25-second application startup times.
- Reduced false-positive deployment failures in Helm-based releases by aligning pod-readiness checks with actual application startup behavior, cutting unnecessary rollbacks.
- Analyzed OpenSearch logs and API request-response flows to investigate production errors, identify root causes and support incident resolution.
- Supported application deployments through Jenkins CI/CD pipelines and coordinated with development teams during deployment and production issues.
- Validated REST APIs using Postman, checking response behavior and assisting with API-level troubleshooting across services.

TECHNICAL SKILLS

Monitoring & Observability: Grafana, OpenSearch

CI/CD & Deployment: Jenkins, Git

Containers & Orchestration: Docker, Kubernetes, Kind, Helm

Linux & Web: Linux, Ubuntu, Nginx

Cloud: Cloud infrastructure on AWS (EC2, VPC, Security Groups)

API & Testing: Postman, REST APIs, HTTP

CORE COMPETENCIES

Production Monitoring • Incident Management • Troubleshooting • Log Analysis • Root Cause Analysis • API Debugging • Cloud Support • Communication • Team Collaboration • Problem Solving • Adaptability

PROJECTS

Kubernetes Application Deployment & Troubleshooting | Personal Project

Technologies: Kubernetes, Kind, Docker, YAML, kubectl

- Created a local Kubernetes cluster using Kind and deployed a containerized application.
- Configured Kubernetes Deployment and Service manifests to manage application pods and expose the application.
- Loaded the Docker image into the Kind cluster and verified successful pod deployment.
- Troubleshot pod startup and restart issues using kubectl get pods, kubectl logs, and kubectl describe pod.
- Validated application availability using health checks and API responses.
- Investigated container restart behavior, including an earlier exit code 137, as part of the troubleshooting process.

Event Management System

Technologies: HTML, CSS, JavaScript, PHP, MySQL

- Developed a full-stack application with user/admin dashboards and event booking workflows.
- Deployed the application and tested real-world usage for one month.
- Worked with MySQL for data storage and performed basic application debugging.

EDUCATION

Bachelor of Computer Applications (BCA)

2025

Smt. P.N. Doshi Women's College, Mumbai

HSC – Commerce

2022

Kirti M. Doongursee College, Dadar

SSC

2020

Indian Cultural English High School, Kalyan

LANGUAGES

Marathi • Hindi • English
